to the listed building including; rearrangement of basement and subbasement plan form for new ancillary gym and spa facilities including lowering of the modern basement slab within the Tavistock Room, reinstatement of original swimming pool at sub-basement level, installation of ancillary bar and WC's at ground floor level, provision of a new entrance canopy at upper ground floor terrace level on the western elevation, installation of new bin store within the south elevation external lightwell, installation of partitioning within the Queen Mary Room, extension within the northern internal lightwell at basement and ground floor level, reconfiguration of internal plan form at eighth floor level and installation of pergola at eighth floor roof level, provision of a new service lift, re-landscaping of the passageway, and other associated alterations

		The works involve replacing the existing heating, steam and condensate pipework that are currently in a sub-basement duct which runs between the adjacement Rockefeller Building and The Cruciform. The route of the new pipework runs at basement level via the link tunnel between the two building and vaults adjacenet to The Cruciform		
2016/4926/L	UCL Cruciform Building Gower Street London WC1E 6AE	Building. As part of the re-routing the pipework will need to leave the vaults, cross the lightwell and entre The Cruciform basement plantroom via new core drilled holes. The reason for the re-routing is that the structural condition and presents of asbestos would entail a prolonged shutdown of the existing services and as this is the only source of energy for the bulding it is the only real option.
